DPS RCCD NCJIS MODERNIZATION PROGRAM

Importance and necessity of moving forward

- ✓ Governor's Goals: safe and livable communities; vibrant and sustainable economy; and efficient and responsive state government
- ✓ Systems used by thousands of criminal justice entities nationwide in the course of their missions to ensure public and officer safety
- ✓ Systems used by thousands of civil entities for employment and licensing people in positions of trust, adoption, international travel, etc.
- ✓ Systems used by Brady Point of Contact Firearms entities nationwide to make firearms possession determinations
- ✓ Several of the systems currently supported by a small vendor retiring in the next 1-4 years
- ✓ Remaining systems supported by EITS with minimal staff
- ✓ Systems outdated and no longer supported thus making them vulnerable to security threats
- ✓ Systems overly complex
- ✓ Systems at significant risk of imminent failure

Risks of doing nothing

- ✓ Major unplanned long term outages with potential tragic consequences (loss of life) due to these systems not being accessible by the criminal justice agencies nationwide
- ✓ Inability to comply with FBI and current state requirements
- ✓ Continued difficulty implementing congressional and state legislative mandates

Method for selection of a replacement solution

- ✓ Release Request for Proposals in mid-2019 for off-the-shelf and cloud-based solutions (co-location, cloud and consolidation)
- ✓ Estimated \$58M over 7 years – funding source(s) TBD
